EDUCATION

- B.Sc. in Computer Science** | University of British Columbia 2026–2029
- Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Statistics, Multivariable Calculus, Discrete Mathematics
 - Transferred from Langara College (2025 – 2026), GPA: +3.8, Dean's Honor Roll*

EXPERIENCE

- Junior Developer Intern** | Media 1248 (ActiveReleaf.ca) May 2023 – Oct 2023
- Engineered an automated inventory synchronization system using **Google Apps Script**, eliminating manual reconciliation between internal systems and e-commerce platform data
 - Developed and maintained production WooCommerce/WordPress systems using **JavaScript, PHP, HTML/CSS**, improving site reliability and reducing bot/spam traffic
 - Built a responsive e-commerce portal and landing page supporting product launch and external sales workflows
- Assistant Program Coordinator** | TonariGumi Volunteers Association Mar 2024 – Mar 2025
- Led a team of **+20** volunteers to run a digital literacy program supporting **250+** seniors across Metro Vancouver
 - Created and delivered **+30** workshops and **+70** 1:1 support sessions on cybersecurity, devices, and online services
 - Managed **\$20K** of government funding to coordinate community partnerships and expand service reach
 - Maintained program website using **HTML/CSS/JS**, ensuring intuitive UI for seniors of all abilities

ACTIVITIES

- App Design and Development Competitor** Sep 2020 – Apr 2025
Game of Apps, Institute of Applied Design & Technology Education Society
- Designed and developed **Android** applications using **Java** and **Figma** in cross-functional teams.
 - Conducted **user interviews** and translated research findings into product features and **UX/UI** improvements.
 - Presented completed applications to industry professionals and technology judges
- Computational Neuroscience Student** Jul 2025
Neuromatch Academy
- Analyzed electrocorticography (ECoG) neural data using **Python, NumPy, Pandas, and scikit-learn**
 - Implemented preprocessing pipelines, feature extraction, and exploratory analysis for working-memory datasets
 - Applied machine learning models including logistic regression and SVMs to analyze neural activity patterns

PROJECTS

- uRelief:** Connecting those experiencing homelessness with essential resources. ([Github](#) | [Pitch](#))
- Developed an **Android** application in **Java** connecting users with local shelters and essential resources
 - Designed interactive **UI** prototypes in **Figma** based on user interviews
 - Awarded **Best Overall App** (Game of Apps Season 6)
- Poses For Dummies:** Real-time pose tracking party game with sabotages and powerups! ([Github](#) | [Writeup](#))
- Stack:** React, WebSockets, p5.js, MediaPipe, Cloudflare
 - Built a real-time multiplayer web system using WebSockets for synchronized gameplay across clients
 - Integrated pose estimation pipeline with rendering system for live motion tracking
 - Implemented gameplay logic supporting sabotage mechanics, latency-tolerant updates, and real-time state synchronization
 - Awarded **3rd Place** – Pipeworks / Game Development Track (Quack Hacks 3 | +70 teams)

SKILLS/CERTIFICATIONS

Languages: Python, Java, C++, JavaScript, PHP, SQL, HTML/CSS, Swift
Frameworks & Libraries: React, Flask, p5.js, Mediapipe
Tools: Git, Docker, Linux, Cloudflare, REST APIs, Figma
