Fengxiao (Aki) Xu

akixuu@student.ubc.ca | github.com/akixuu | akixuu.github.io | linkedin.com/in/akixuu

Education

University of British Columbia — Vancouver, BC
Bachelor of Science in Computer Science — *Sep. 2025 – Dec. 2028*

- **Activities**: Computer Science Student Society (Internal Officer + Webmaster), Game Dev Club, ACM (ICPC) Club
- **Awards**: ScotiaBank Scholarship, Dean's Excellence Scholarship (Langara)

Experience

Software Developer (Part-time) — Vancouver, BC
Media 1248 (ActiveReleaf) — *Apr. 2023 – Sep. 2023*

- Automated inventory synchronization system for **+75 products** using Google Apps Script, eliminating manual reconciliation between internal systems and web platform data, **reducing API calls by 90%**
- Maintained production e-commerce systems ($1mil sales/yr) using JavaScript, PHP, HTML/CSS
- Built a responsive, SEO-optimized landing page to support product launch (**grade A on GTmetrix**)

Projects

Poses For Dummies | *TypeScript, React, MediaPipe, Socket.io, CloudFlare* | Link

- Co-developed a multiplayer body-tracking party game that uses computer vision (MediaPipe) and web sockets
- Wrote dynamic pose-tracking logic to map joint movements on the client device and send player data to the server
- Reduced data streaming and computer vision settings for a lag-free playing experience (**>50ms latency**)
- **Awarded 3rd Place** – U. of Oregon Hackathon (Game Development Track), competing against **220+ hackers**

NoNotes | *Python, Flask, BERT, SQLite, JavaScript* | Link

- Co-developed note-taking app that transcribes audio and summarizes key points using NLP (BERT) models
- Built audio processing pipeline with Google Speech Recognition to summary generation
- Built a responsive web interface and Flask API backend utilizing SQLite with URL-safe identifiers
- **Awarded 1st Place** – Happy Hacks Hackathon II, competing against **80+ hackers**

Neural Data Analysis | *Python, NumPy, Pandas, Scikit-learn, MNE* | Link

- Analyzed brain activity datasets (ECoG) from epilepsy patients performing working memory tasks
- Filtered multi-channel signal data and created **3D visual models** of **+15 electrode placements** for interpretation
- Delivered a research report and presentation mapping neural activity to cognitive memory workloads

Activities

Developer and Designer — Metro Vancouver, BC
Game of Apps — *Sep. 2020 – Apr. 2025*

- Achievements: **Best Overall App** (2023, 2025), **People's Choice** (2022), **Outstanding Developer** (2023)
- Co-developed **+4** community-focused **Android**-based **Java** applications pitched to a panel of industry judges
- Optimized app performance by designing robust database models with **SQL** and implementing caching, significantly reducing load times and battery consumption
- Conducted **+15 user interviews** and research to convert problems into features and improve on UX/UI

Assistant Program Coordinator — Vancouver, BC
TonariGumi Japanese Volunteers Association — *Mar. 2024 – Mar. 2025*

- Led a team of **+20 volunteers** to run a digital literacy program supporting **250+ seniors** across Metro Vancouver
- Created and delivered **+30 workshops** and **+70 1:1 support sessions** on cybersecurity, devices, and online services

Electrical Assembly Student — Richmond, BC
Arrow Speed Controls — *Mar. 2024*

- Assembled and wired industrial electrical control panels based on engineering schematics
- Performed quality and safety testing on **+10 electrical assemblies** to ensure proper wiring

Technical Skills

Languages: C++, Python, Java, TypeScript, JavaScript, SQL, NoSQL, PHP, Swift
Frameworks/Libraries: React, Node.js, Flask, Socket.io
Tools: Git, Linux, Cloudflare, Android Studio, MongoDB, DigitalOcean, Figma, PostMan, REST APIs, Unit Testing
Spoken Languages: English (Native), Japanese (Professional), French (Elementary)
